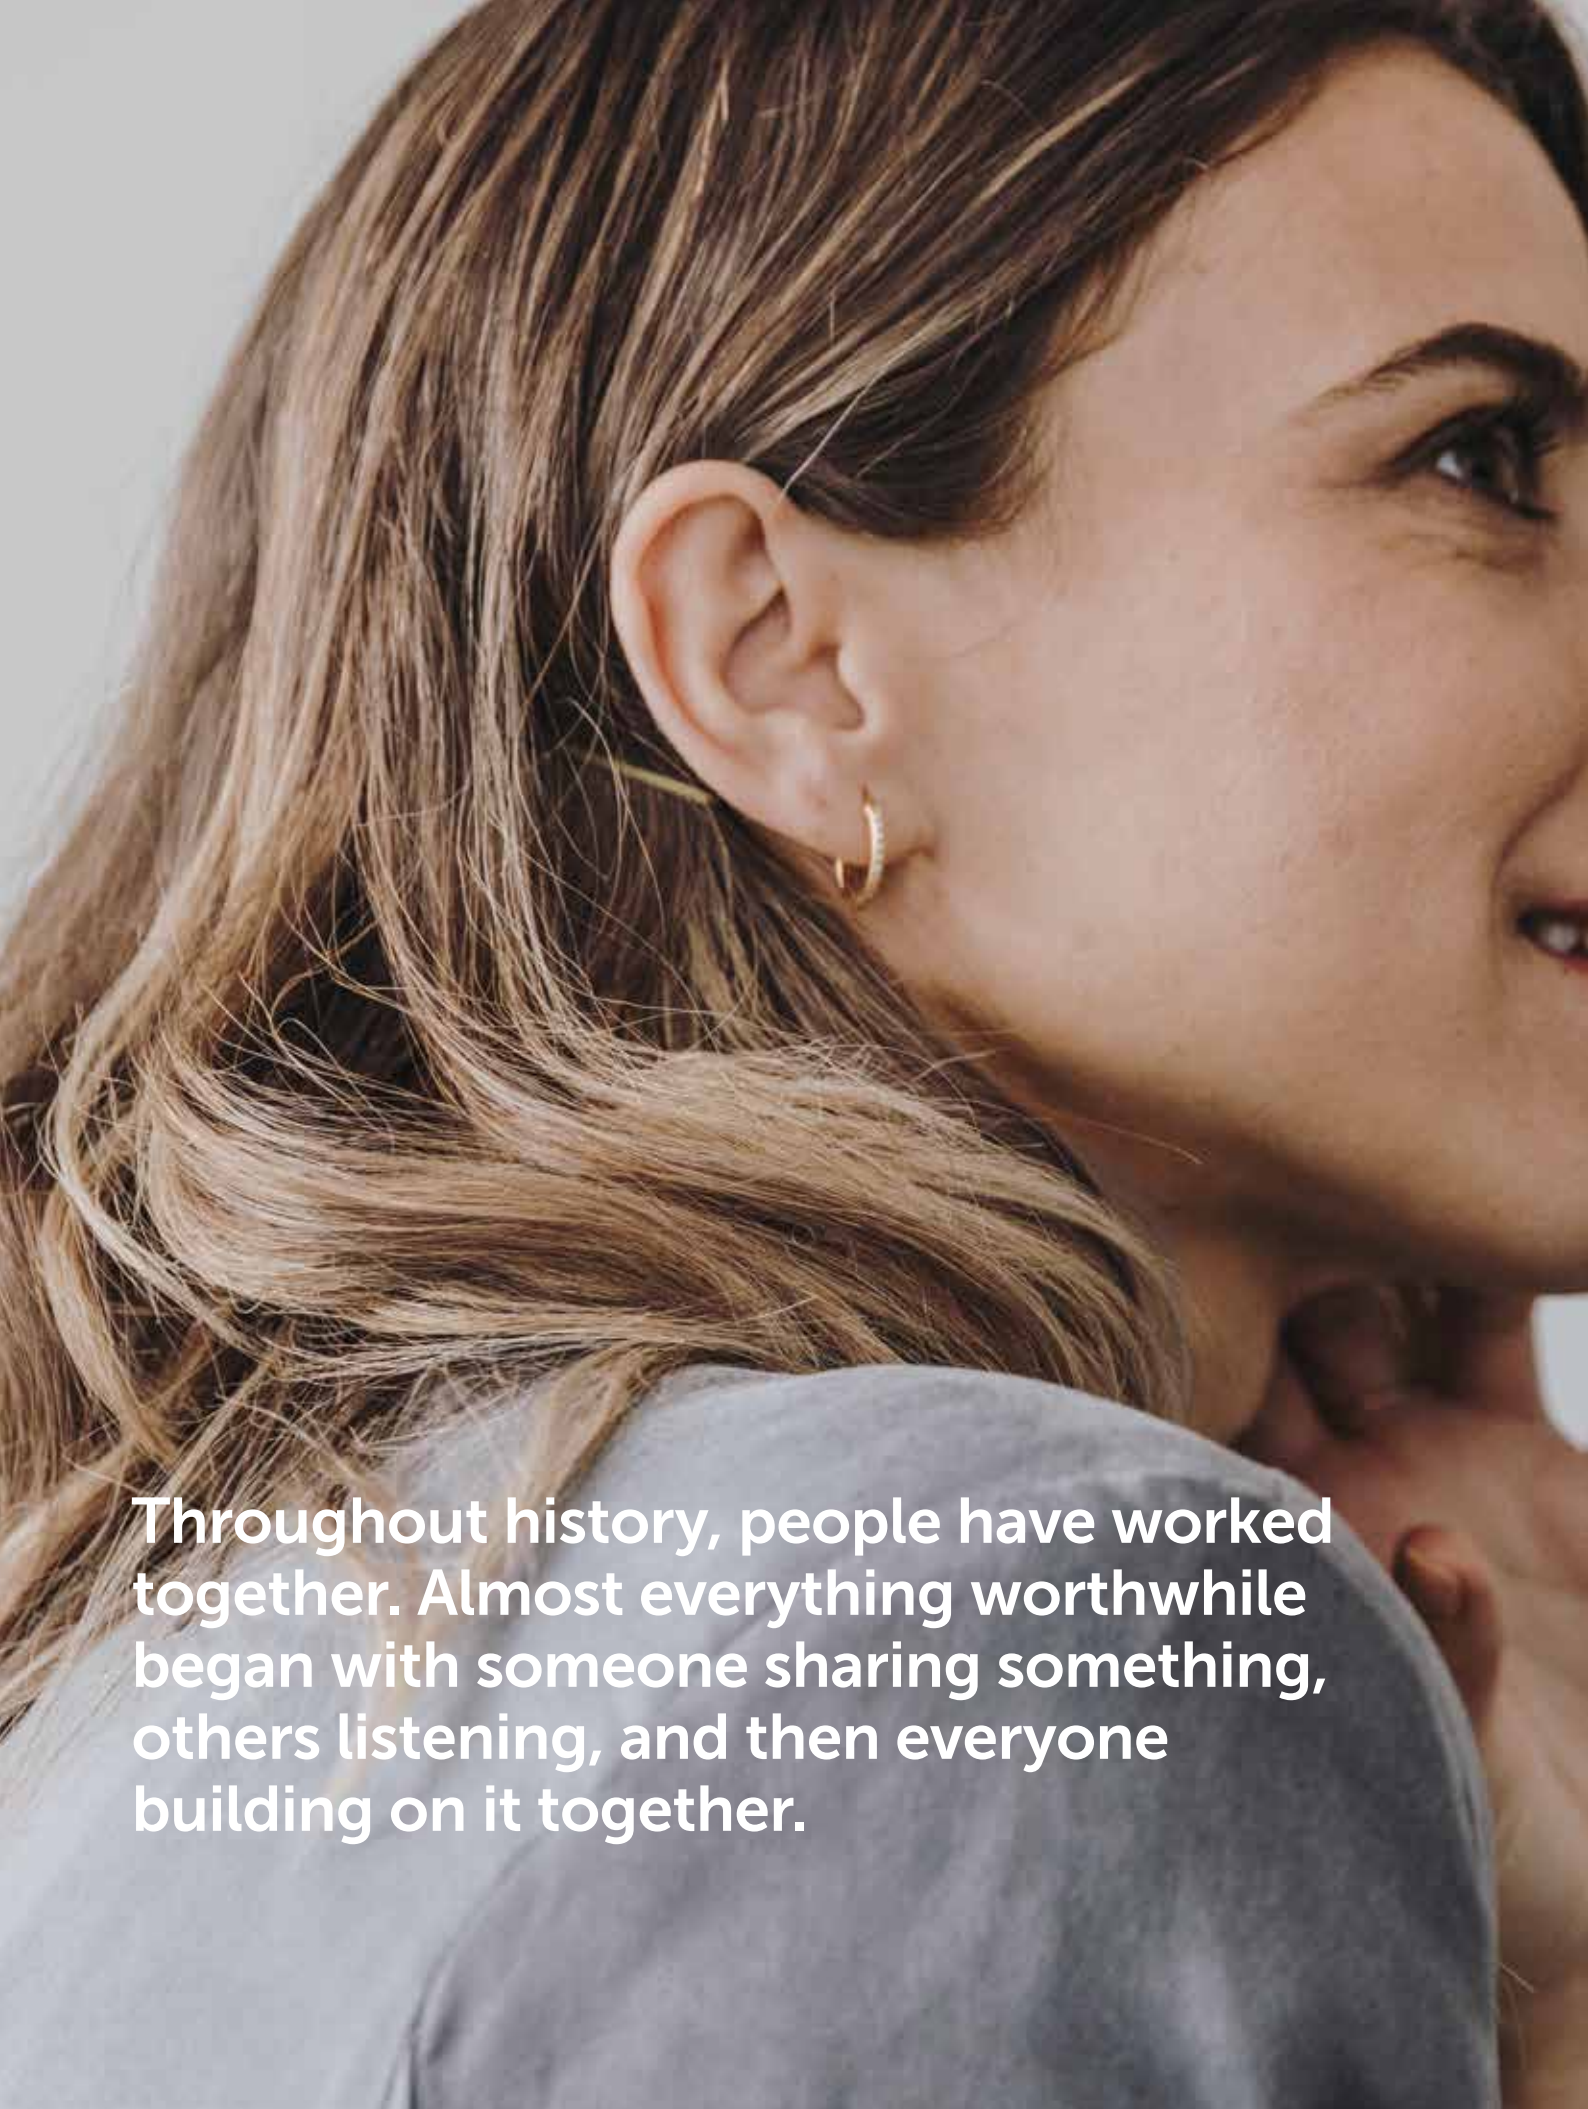
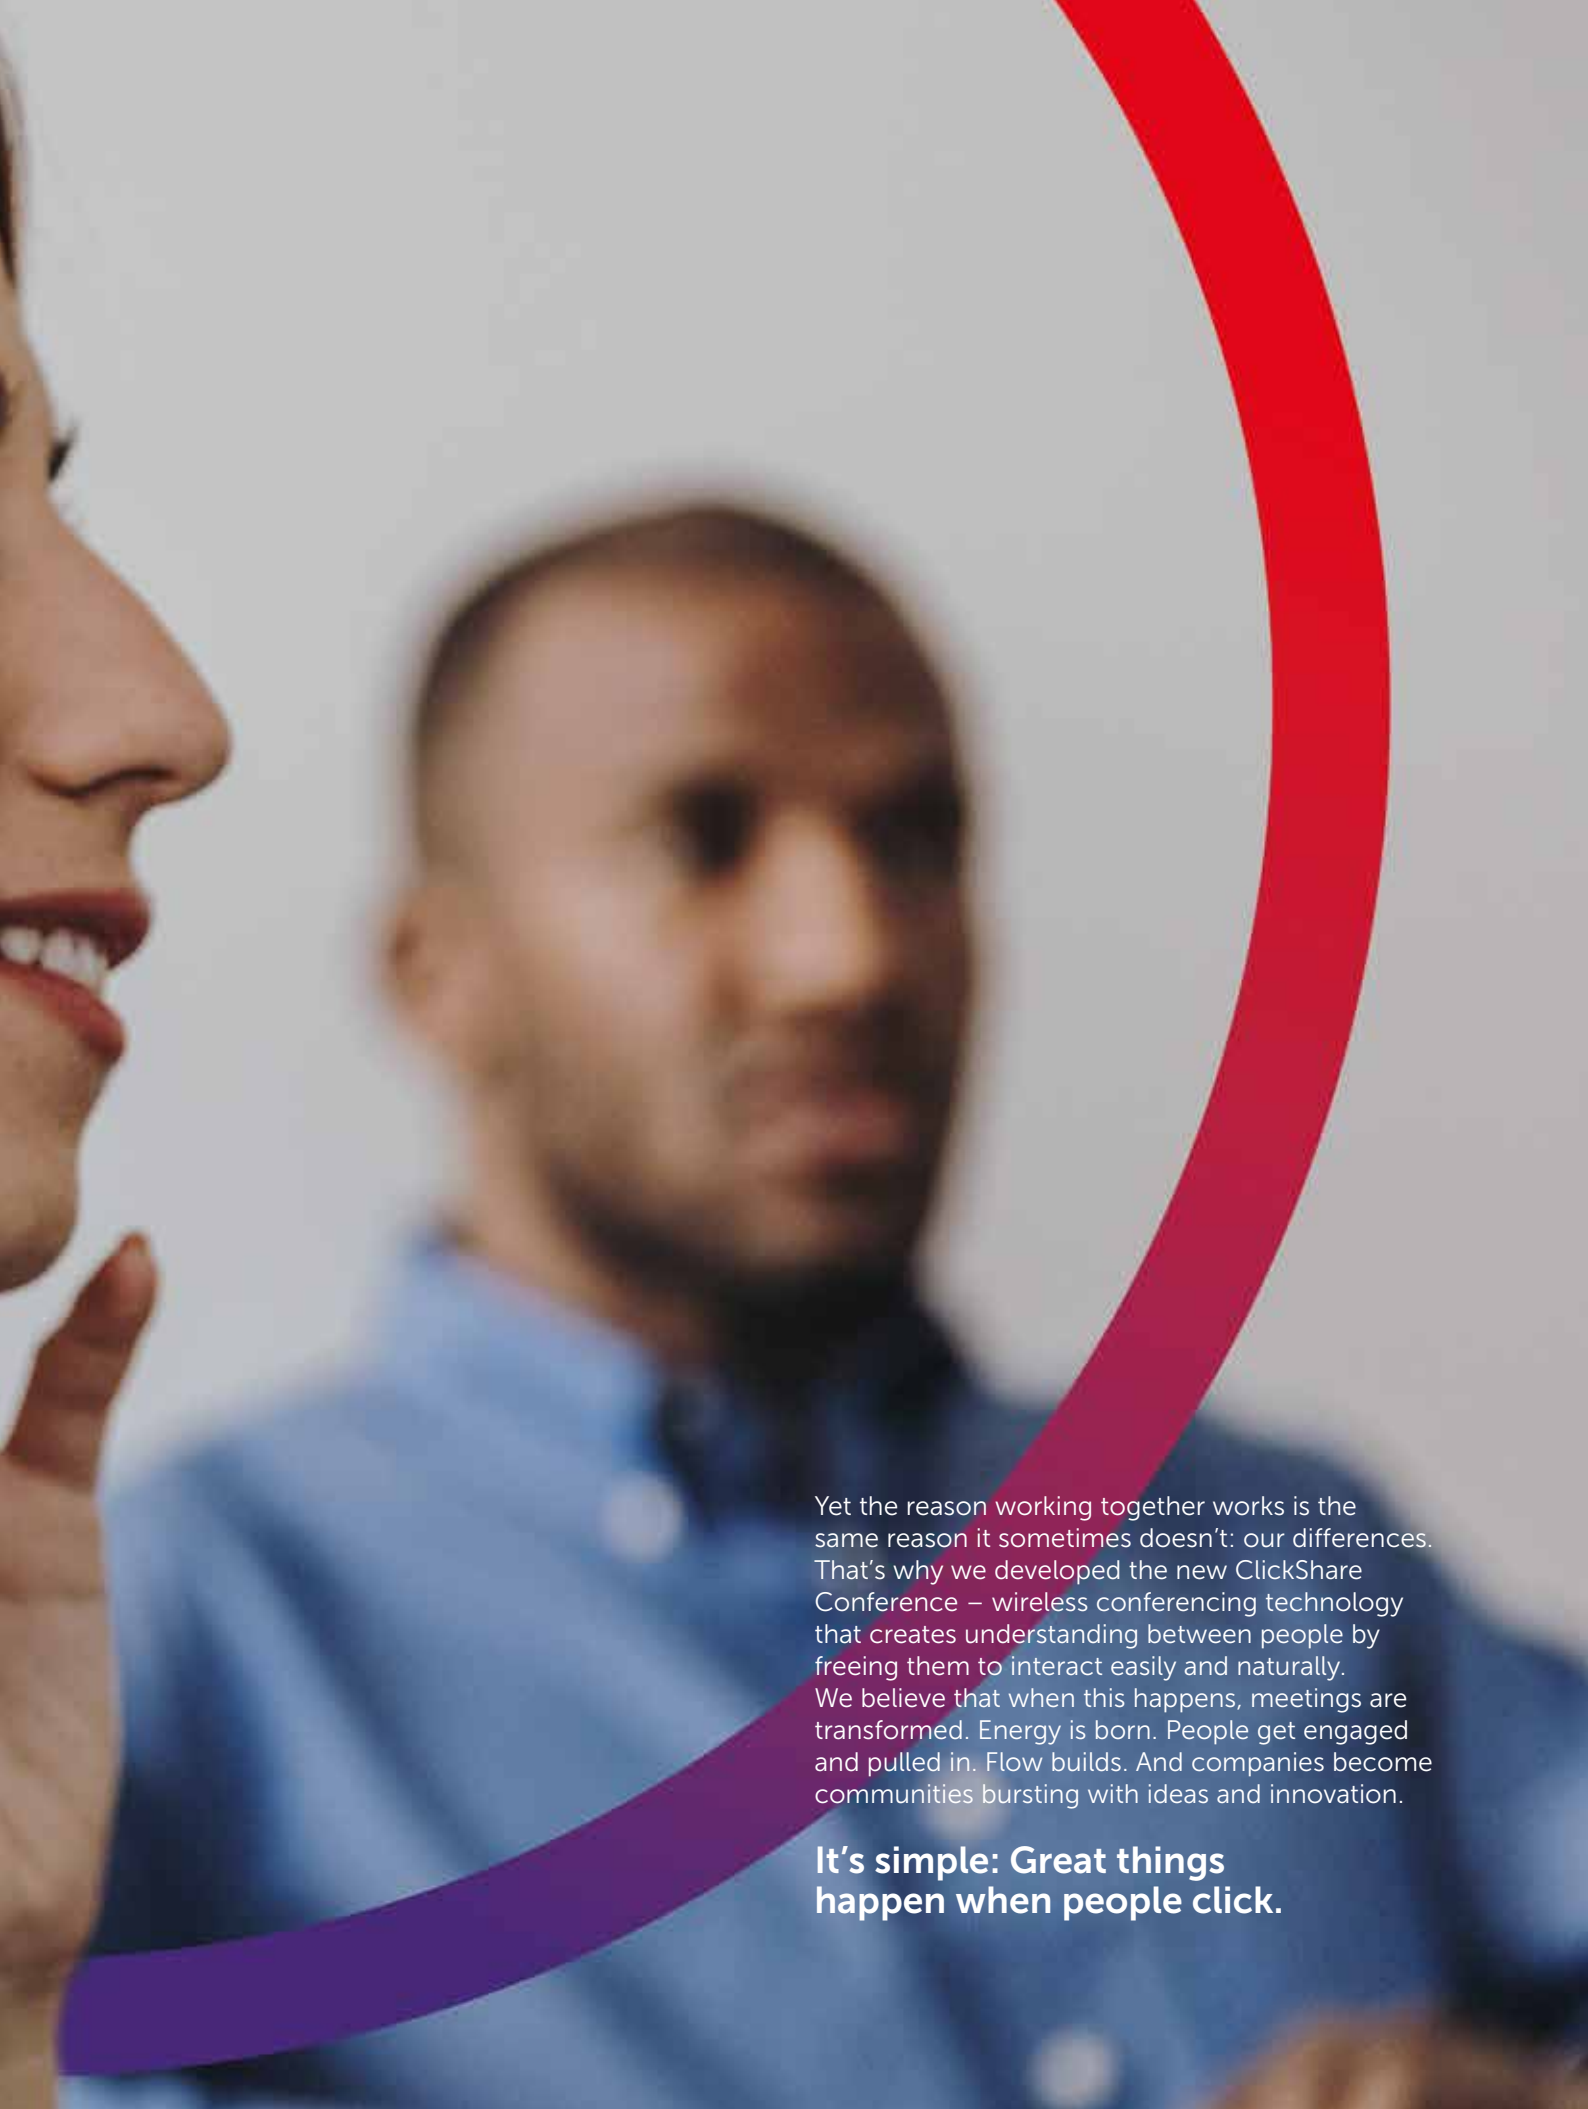
ClickShare family brochure

Great things happen when people click

BARCO



Throughout history, people have worked together. Almost everything worthwhile began with someone sharing something, others listening, and then everyone building on it together.



Yet the reason working together works is the same reason it sometimes doesn't: our differences. That's why we developed the new ClickShare Conference – wireless conferencing technology that creates understanding between people by freeing them to interact easily and naturally.
We believe that when this happens, meetings are transformed. Energy is born. People get engaged and pulled in. Flow builds. And companies become communities bursting with ideas and innovation.

It's simple: Great things happen when people click.

Meet, collaborate, click

With ClickShare, wireless presentation and conferencing technology, you bring simple, efficient and straightforward meetings into your company. It only takes a single click of the ClickShare Button to set up your meeting and start sharing what's on your laptop or mobile device, on a presentation screen. Within seconds you have transformed a meeting into a complete, collaborative sharing experience. In any type of meeting room.

No cables, no set-up, no waiting to join in. Meetings keep their flow and you keep your cool.

For your day-to-day content sharing and interactive collaboration, ClickShare has a range of wireless presentation solutions. Next to this, we also launched a range of wireless conferencing solutions for all your remote meetings.

No wires

ClickShare's universal USB-powered Buttons and ClickShare App for laptops, iOS and Android avoid the unsightly jumble of cables often seen in meeting rooms, the need for additional wires or rummage under the table. And with no cables, you'll spend less time setting-up and more time being productive.

Intuitive

ClickShare couldn't be more seamless. Everything works with a single click, leaving nothing more to figure out. Connecting ClickShare with Button or App does not alter your screen size or resolution, so what you see on your laptop screen is replicated on the big meeting room screen.

Stress-free

Technology is on your side with ClickShare, its intelligence works everything out for you. With ClickShare in a meeting room, you can feel confident that your important presentation will transfer to the big screen at a single click.

Cross-devices

Combining Button and App will give you an enriched content sharing and collaboration in your meetings. Choose either the USB-powered ClickShare Button or the ClickShare App to expand meeting effectiveness.

BYOD & BYOM

ClickShare wireless collaboration solutions are exactly what you need: easy and intuitive to use. Our range is perfectly suited for BYOD - Bring Your Own Device - as it allows people to share content from any device. Also, ClickShare Conference is the perfect match for BYOM - Bring Your Own Meeting – because people can host a conference call using their preferred conferencing platform from their own laptop.

Agnostic

The ClickShare range is truly agnostic, sharing can be done from any device – laptop, mobile or tablet where it are Windows, Android or Mac devices. ClickShare Conference is even triple agnostic: not only is it device-agnostic, it also works with the UC solutions of your choice - no matter which - and instantly connects to the AV USB peripherals (speakerphones, soundbars, cameras) of the meeting room.*

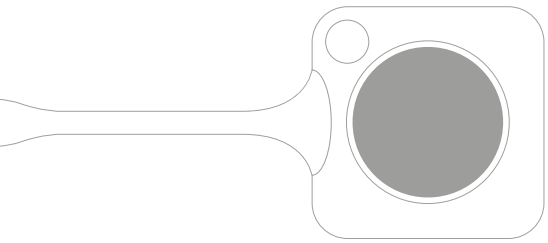
*A list of validated peripherals is available online

The beauty of Button and App

The ClickShare Button

Plug the Button into your laptop, start the application and click

The iconic ClickShare Button puts the 'Click' into ClickShare: connect to any laptop with a USB port, start the application, click to share content instantly and wirelessly. No set-up, no time lost. There is a USB-C and a USB-A version available.



For the ClickShare Conference range we offer a new Conferencing Button that connects you to cameras, soundbars and other AV USB peripherals* in the room in seconds for a better, more immersive meeting experience. This Conferencing Button has an additional quick button that enables you to get a copy of the main screen on your laptop, making it simpler to follow everything in full detail. It also opens up a range of advanced functions.

*A list of validated peripherals is available online

ClickShare Button and App at a glance

ClickShare Button

- Plug in and have immediate access to wireless collaboration or conferencing (with the Conferencing Button only)
- Single-click screen sharing
- Intuitive design makes it easy for guests to use

Collaboration App

- Join the conversation effortlessly
- Access advanced collaboration features (e.g. pause function, window selection, moderation, interactivity, second screen)

The Collaboration App

Features for more intuitive collaboration

The new ClickShare App makes collaboration more intuitive than ever before. The App easily connects to the meeting room, offering screen sharing as well as a host of advanced features. The App works on all devices, from desktop to Android and iOS. You get access to a set of advanced collaboration features (that we will continuously expand):

- **Pause:** freeze the content shared on the meeting room screen while you prepare what to show next
- **Window selection:** select the application or document you want to show from all open windows on your laptop
- **Moderation:** control your meeting and preview all documents to decide what appears on screen with all people involved, regardless of whether they are sharing with the App or the Button
- **Extended desktop:** perfect if you want to share from your laptop and at the same time take notes
- **Interactivity:** enriched collaboration with annotation and blackboarding
- **Local view of the room display:** view the main display on your personal device and share with remote participants in your conference solution

Collaborate in style

To help you keep control of the meeting content and raise the level of engagement, ClickShare has an advanced set of interactivity features at your fingertips.

These additional functionalities encourage the natural flow of ideas, help to capture additional thoughts of the content shared. With touchback support ClickShare adds energy to meetings and leads the way to more innovative methods of collaboration.

ClickShare devices are compatible with a series of touch screen panels, which creates opportunities for the use of other interactivity features like moderation, blackboarding or annotation. Check the product overview to find out if your model supports the touch back and interactivity features.

Always up-to-date

Our wireless collaboration solutions help you to seamlessly and instantly share content in (remote) meetings and enhance collaboration in any room of your enterprise.

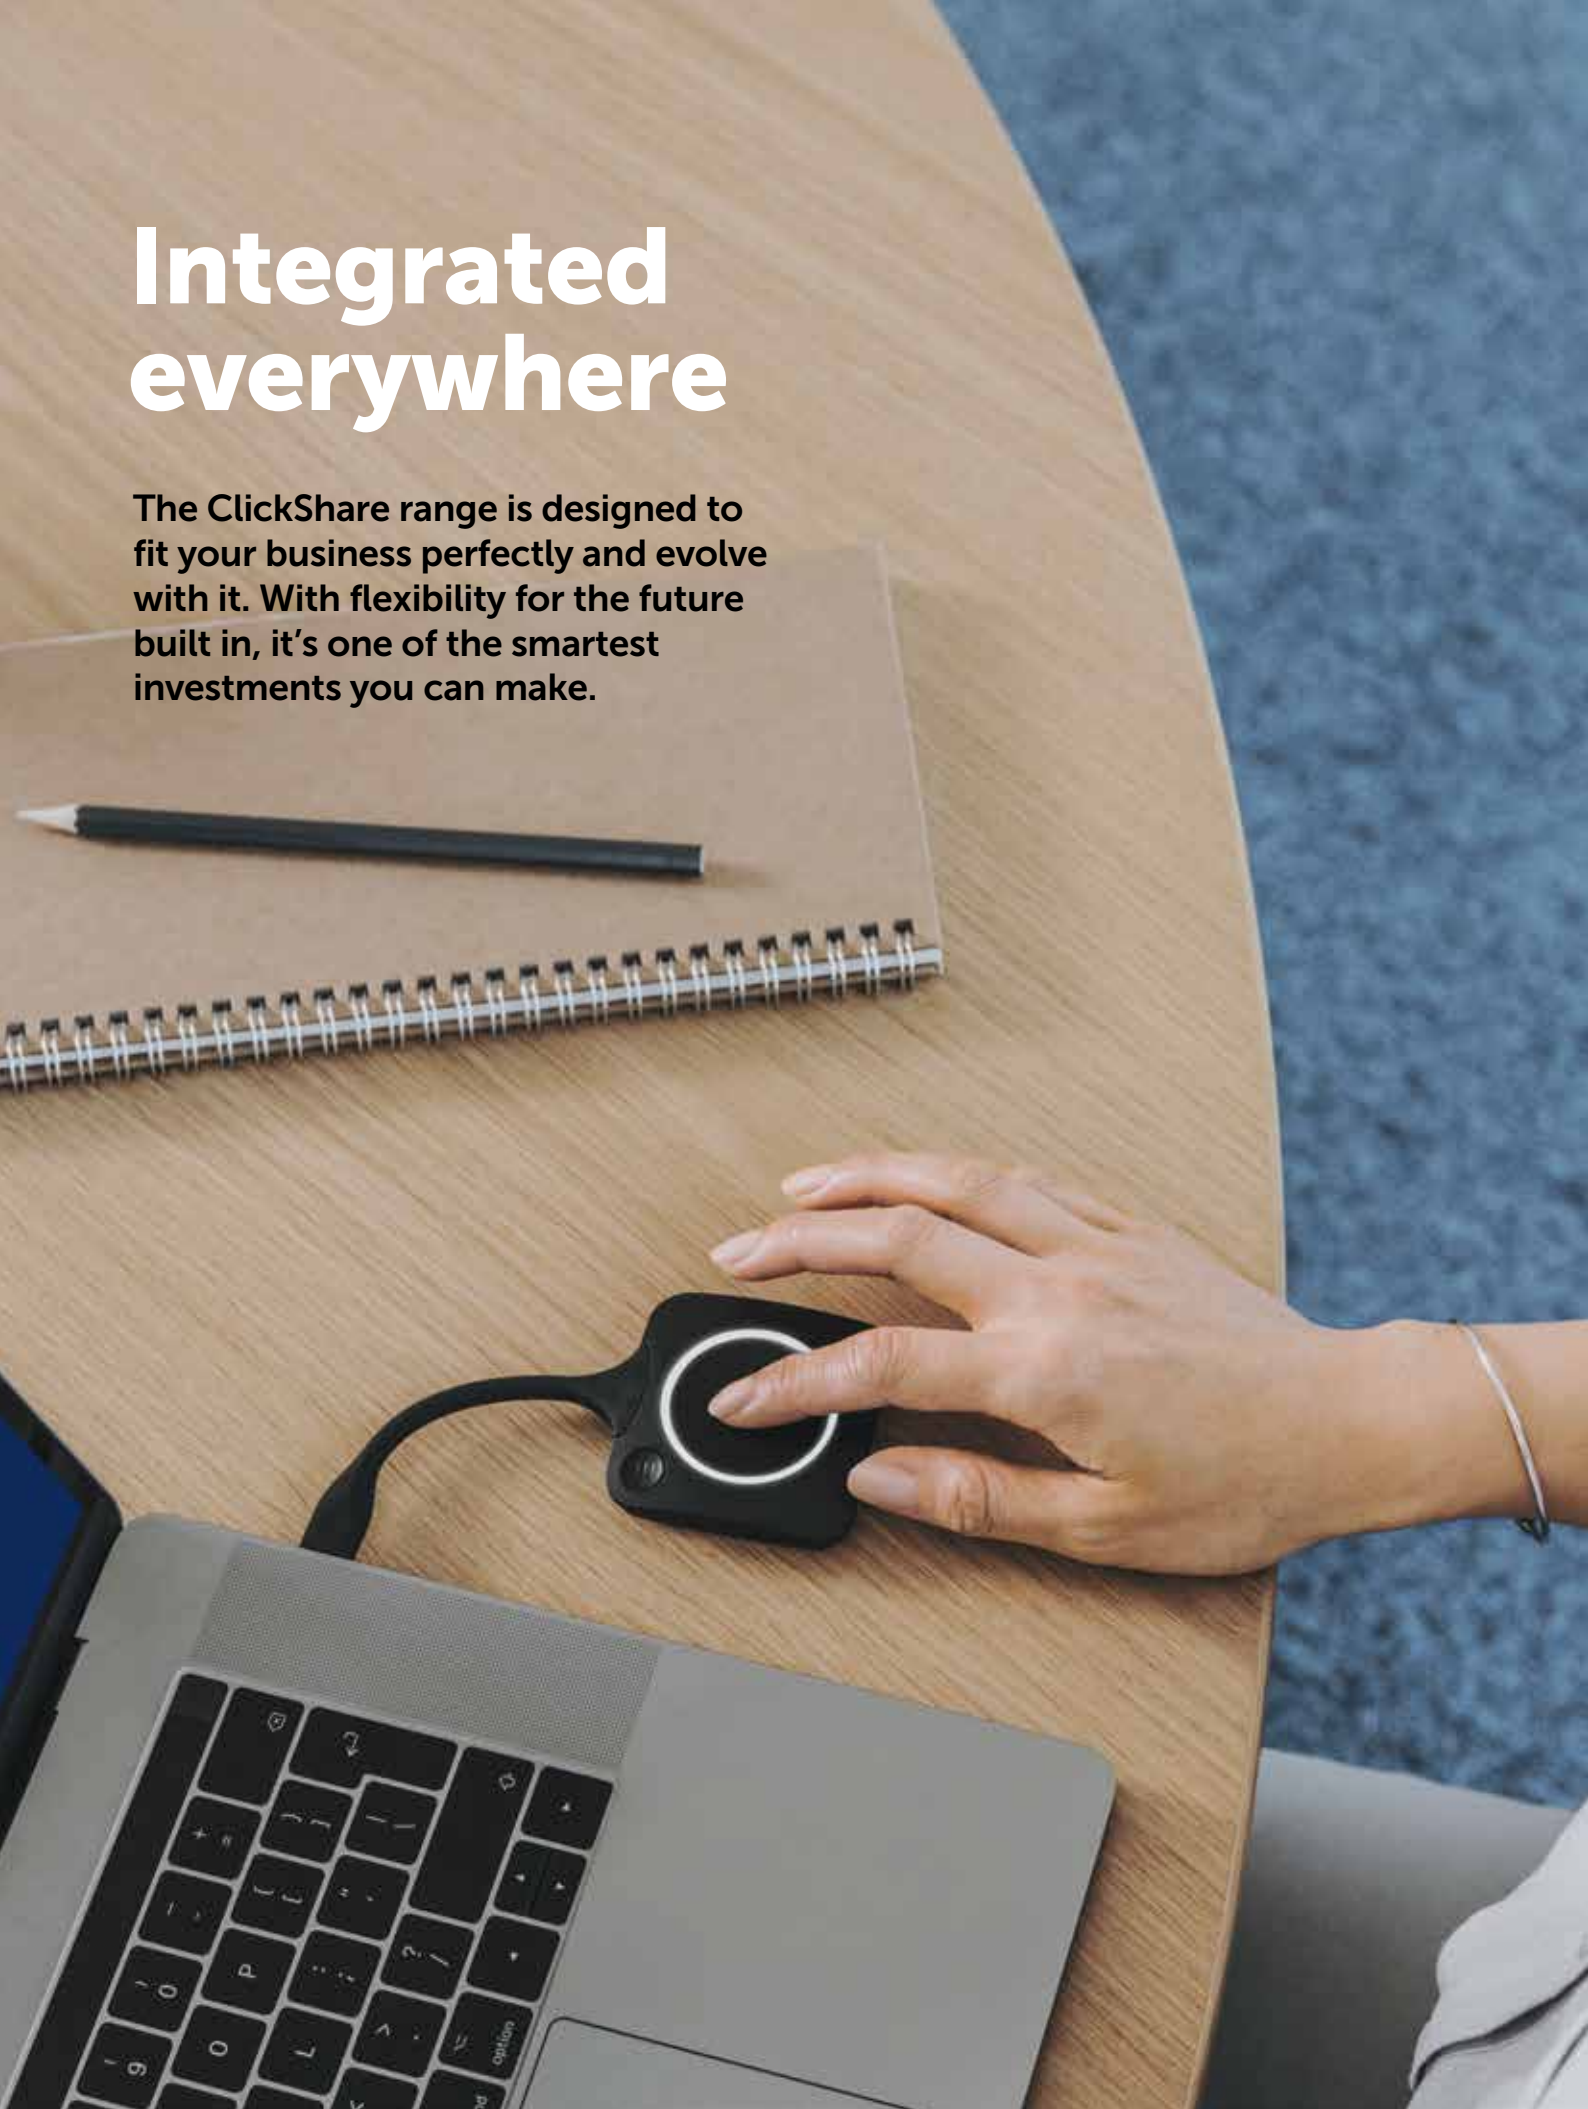
To keep the high standard of performance of our meeting technology, it is of the utmost importance to keep units up-to-date with regular free updates. ClickShare helps you to maintain the quality and security of your meeting collaboration hardware and keeps your units as powerful, efficient and user-friendly as possible with quarterly firmware updates.

Updating is easy

- Your unit comes with auto-update by default– just hook the unit onto the network to receive the latest experience
- Update a fleet of ClickShare units via the XMS Cloud Management Platform
- Connect to a laptop to upload the new firmware manually or plug in a USB stick with the latest firmware
- Subscribe to our newsletter or keep your eyes on our ClickShare blog for regular updates on our latest Firmware, product releases, tips and tricks.

Integrated everywhere

The ClickShare range is designed to fit your business perfectly and evolve with it. With flexibility for the future built in, it's one of the smartest investments you can make.



Designed for your network

Whether you want to connect one unit to the network via ethernet or create a dedicated VLAN for all ClickShare units, you can simply integrate seamlessly with your network.

Secure by design

Every ClickShare communication is authenticated and encrypted by default, harmonizing with your network and governing security principles.

ISO 27001 certified

ClickShare was the first wireless collaboration technology to obtain ISO 27001 Certification, demonstrating our commitment to the right processes and structures for the highest international security standards.

Management dashboard

Managing ClickShare across your business is simple with our XMS (Cloud) Management Platform. Units are discovered easily and added to the management console with key information available on a dashboard. Administrators can intervene remotely without interrupting the meeting.

Insights integrated

Imagine having instant insights on how often meeting rooms are used and how people use ClickShare when things are hectic or quiet. With the insights module of the XMS (Cloud) Management Platform, you can understand behavior in the workplace and run your workspace more efficiently.

Always up-to-date

The new ClickShare is always new. It can be updated automatically, at scheduled times with your XMS (Cloud) Management Platform console or manually. You can be sure you have the latest version of wireless conferencing to give you the competitive edge.

SmartCare (wireless conferencing) EssentialCare (wireless presentation)

Includes five years of warranty and a license to the XMS insights module, as well as advanced access to the helpdesk.

The same experience, from huddle to boardroom

With ClickShare, everyone across the organization can enjoy a seamless experience – no matter where or how they're working.

In fact, the technology is so simple and intuitive, anyone can start a meeting anywhere. Just launch the App or plug in the Button and everything you need is provided automatically.

Whether it's a quick huddle over coffee or a formal presentation in the boardroom, ClickShare makes it easy for people to click so that great things can happen.

50%

of people said room availability is a frequent problem. By allowing more spaces to become great meeting spaces, ClickShare transforms the possibilities within every building.

Perfect Meeting

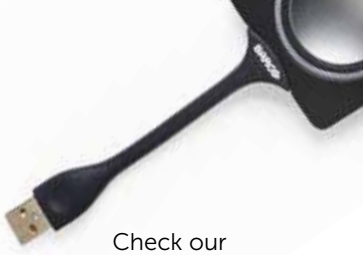
ClickShare overview

How do our product ranges differ?

When it comes to ClickShare, our range of wireless presentation and wireless conferencing systems couldn't be more different. They are designed to offer you something different, and you have the freedom to choose which is right for your enterprise.

great things happen when people click



Check our side-by-side comparison. While both solutions offer a seamless, wireless approach with no training required and fast, effective guest access – along with enterprise-grade security – there are some key differences.

What is ClickShare - wireless presentation solution?

ClickShare wireless presentation & collaboration solutions enable you to connect any device - laptop, mobile or tablet - and start sharing content on the main meeting room screen in seconds. A range of interactive features like extended desktop, moderation, annotation or blackboarding help to make your meetings more collaborative and active. Wireless content sharing can add real value in any meeting room, from huddle to boardroom.

What is ClickShare Conference - wireless conferencing solution?

ClickShare wireless conferencing solutions help you to conduct a remote meeting flexibly, freely and easily without the need for cables. Our solutions are all about wireless conferencing and BYOM (Bring Your Own Meeting), as they allow you to join any type of video conference from your own familiar device, whether you are in huddle, a meeting room or a board room. ClickShare Conference works seamlessly with your videoconferencing software, your AV peripherals, your laptop, and most importantly, makes remote meeting as intuitive as having a face-to-face meeting.
