

4K HDMI Wireless Dongle

Description

The WMF-HDMI-D is a HDMI dongle for use in conjunction with the Blustream WMF51 and WMF72 wireless multi-format BYOD solutions. The dongle provides wireless AV and data connectivity to the WMF hubs from a HDMI device.

The WMF-HDMI-D supports video resolutions up to 4K 30Hz and features touch-back connectivity from the WMF hub when connected to a USB/KVM device (I.E touch panel monitor) directly connected to a WMF hub. The unit features driverless connectivity, and features Share/Connect & Content Freeze buttons, and a Custom function button for recall of a programmable function of the WMF hub it is paired with.

Key Features

- Wireless sharing from HDMI sources including laptops, smartphones, tablets etc.
- Supports video resolutions up to 4K@30Hz
- Plug-n-play - no software installation required for content sharing
